How Can We Help You?

About Us

TECSCAN established in 1986, manufacture very high quality print inspection systems. We have the experience to inspect print on any type of substrate including holograms, reflective inks, reflective substrates, transparent substrates, foil, various UV security inks and many other applications. We are a flexible company that is very happy to speak to you about **YOUR** requirements however individual they may be. Please contact us to discuss your particular application in more detail.

TRACEABILITY ACHIEVED WITH THE TECSCAN COLD SEAL SYSTEM

A leading producer to the food industry has recently installed a Tecscan system to view cold seal on metallised substrate.

TecScan's unique system produces an on screen see-through effect showing the actual cold seal from one side and the print from the other which allows the operator to view 'in register' and to run at maximum production speeds. For further information on this product e;mail sales@tecscan.co.uk or telephone **+44 (0)1443 821552**

Label Inspection System

TecScan is rolling out the red carpet for their new area scan AVIS system for Label Inspection. Designed and manufactured by our team of skilled engineers, our state of the art inspection system can be configured to accommodate most manufacturing situations.

- Identify any print or substrate defects through-out the run
- Record Images for later analysis
- Fully compatible with TecScan Advanced defect detection software
- Superior Image Quality
- Competitively priced
