*ISO 9001 Accredited Company - Winners of FlexoTech Award 2012*

## LINE DETECTOR

Tecscan moves it's advanced vision inspection systems another step forward in providing an international company with a solution to detect minute defects in paper processing. This advance in TecScan's technology has provided the company with not only a quality assurance tool to validate the product for their customers but also achieves a very high reduction in waste material during the process.

**TecScan's achievement is more than considerable as the customer had been looking for a solution to this problem for the last 20 years.**

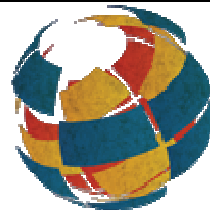

## Print Detection on Corrugated Board

**Smurfit Kappa** has recently taken installation of a TecScan Boardwatcher system at their factory based in Lurgan. The Boardwatcher system was specifically developed for the corrugated industry and is in use in several locations in the UK. The system was developed to address several key issues, namely missing colours, colour to colour registration and print to board registration.

It performs 100% inspection at up to 3 inspections per second with an alarm signal for any non-conforming boards plus an additional output for operating a reject gate where applicable or the signal supplied can be used in conjunction with a tagging system.

**LABELEXPO  
EUROPE 2013**

**24<sup>th</sup> - 27<sup>th</sup> September**

### **TECSCAN at LABELEXPO**

**Contact Mobile No:  
07815 501171**

## RECENT INSTALLATIONS

### EUROPE'S LARGEST PRODUCER

Europe's largest producer of flexible packaging solutions for chocolate confectionery have recently installed a TecScan Series 4 CS2 system **to monitor cold seal to print registration.**

The company based in Saffron Walden work with some of the worlds' leading confectionery manufacturers and brands, from multinationals with complex multi-product and multi-site needs to small niche confectionery manufacturers.

The company ensure that their high-speed filling lines stay high speed and achieve this by constantly investing in new technology to keep their customers ahead of their market.

### AUTOMOTIVE SECTOR

The GSM Group employs over 300 people in five self-contained companies in the UK with Sales and Technical centres in Germany & Italy.

They have recently installed a TecScan Series 4 CS2 web inspection system on their EDALÉ press to enhance their quality control in order to increase speed.

## INFOZONE

TecScan's latest developments include a **TAG DETECTOR** system to provide a fail safe warning system to alert the operator to the proximity of a tag to the fed material – more details will follow at Labelexpo when final trials have been completed.
